IU Indianapolis M.S Applied Data Science – Sports Analytics Specialization Candidate

Aspiring sports analyst with hands-on experience in sports research projects and data-driven insights. Known for a strong work ethic, attention to detail, and collaborative spirit. Passionate about uncovering consumer and performance trends and translating complex data into clear, actionable narratives for organizations, players, and fans.

IU INDIANAPOLIS SPORTS INNOVATION INSTITUTE

IU Indy Jaguars Women's Basketball Analytics

- Created scouting reports and both team-wide and player-specific analyses as a member of the first IU Indy Women's Basketball analytics team
- Developed dashboards, fit models, and optimized lineups with coach input to assist in team development

Indianapolis Sports Survey Design

- Designed a county-wide survey aimed to uncover the community impact and level of fandom in Indy sports
- Will create dashboards and visualizations on the results to discover impactful insights for the Indianapolis and Marion County community

D1 Athletics Staff Web Scraping

- Wrote web-scraping code in Python using BeautifulSoup and Selenium to quickly scrape and document the full staff list of every division 1 athletics department to assist in payroll and hiring related research in D1 athletics

GitHub Pages Website Manager

- Manage, publish, and organize the GitHub pages website for student-led projects from the IU Sports Innovation Institute

TED Sports Indianapolis Volunteer

- Assisted in the on-field activation of the Stephen Hauschka kicking experience and talk at Lucas Oil Stadium with TED Sports through leading groups and assisting with set up and shut down of the event
- Ushered attendees at the speaker events into the auditorium, ensuring a strong crowd presence for the speakers

RESEARCH AND PROFESSIONAL EXPERIENCE

MLS Player Salary Modeling – Wake Forest University

November 2023 – December 2023

- Utilized K-Nearest Neighbors, Elastic Net, and Random Forest models to predict MLS salaries based on performance statistics to discover what players should be worth based on performance.
- Final best model had strong accuracy, with a RMSE of 0.753.

European Soccer Database Design – IU Indianapolis

October 2025 – Present

- Designed and will implement a database in MySQL to record match statistics, player career/transfer history, competition standings, and club staff members.
- The database will provide quicker access to data and analyses for a variety of soccer analysis projects.

Winston-Salem Dash Theme Night Case Competition – Wake Forest University

July 2024

- Planned and presented a Texas Pete theme night for the Winston-Salem Dash through the SportsBIZ program
- Collaborated with a team to design merchandise, in-stadium activations, and promotions for the game
